CAPACITY RANGE (TON)
3.5, 4.5, 5.5, 6.5, 8 and 10

DESIGNED FOR MIDDLE EAST MANUFACTURED IN NORTH AMERICA

- Captured Voice of Customer (VOC) with focus group
- Exceeding GCC Energy Regulations (ESMA, QCC, MEW)

OUR 360°+1 DESIGN PHILOSOPHY

We believe the best design delivers everything our customers need and want... And then some. The Rheem® 360°+1 design philosophy embodies this commitment to examine every aspect of every product (and program) we develop from every angle, so we can provide the ultimate in performance, installability, serviceability, durability, integration, peace-of-mind and partnership for consumers and industry professionals alike. The Rheem® 360°+1 design philosophy applies to everything we do—from the way we build our products, to the way we continue to build our reputation.

360° DURABILITY®

At Rheem®, we're committed to delivering high-performance products that last. Our solutions are designed for peace-of-mind, with more durable components backed by Rheem®'s best-in-class warranty.

360° SERVICEABILITY®

Our products are designed for performance that homeowners can count on. Should service ever be required, our Serviceability features are specially designed to ensure fast, effective service and maintenance calls. Rheem® diagnostic systems make problem-solving quicker, and our products are designed for easy access to unit components. This means they work smarter, so service technicians don't have to work harder.

360° PERFORMANCE®

With every product we design and redesign, we set out to improve efficiency to lower operating costs and energy consumption. We balance these improvements with a commitment to including components that make our products dependable, so trade professionals can continue to offer worry-free comfort to their customers for years to come.

WHAT'S

HIGH PERFORMANCE

- Lower KW per Ton
- Larger Coil Areas
- Thermostatic Expansion Valve
- Larger Blower and Fan Size

ENHANCED DURABILITY

- Metallic Louver Jacket
- 1008 hrs of salt spray
- High-efficiency Scroll Compressor Made in North America
- Critical Components such as Fan, Motor, Blower from reputed brands in North America.

BETTER SERVICEABILITY

- QWIK CLEAN SLIDE OUT DRAIN PAN
- Protected Service Port Access

WE MAKE IT EASY TO
LIVE MORE COMFORTABLY,
**WHILE LIVING MORE
RESPONSIBLY.**

At Rheem®, providing The new degree of comfort® is about more than just product performance—it's about taking a higher degree of responsibility for future generations. That's why, from air to water and residential to commercial, our focus is on creating solutions that leave you feeling comfortable—and leave the planet a little better than we found it.

**EFFICIENT AND EARTH
FRIENDLY PRODUCTS**

We understand that with increased environmental concerns, R22 is becoming less popular. The production of R22 refrigerant contributes to the depletion of the ozone layer and adds to global warming. Rheem® always focuses on environmentally friendly, energy saving and high performance air conditioners and hence today most of Rheem®'s products are developed with R410A refrigerant. R410A refrigerant is highly efficient and has an Ozone Depletion Potential (ODP) of 0.

The new degree of comfort.®

Founded in 1925, Rheem® is nearly a 100 year old North American manufacturer delivering innovative, energy-efficient air conditioning and water heating solutions under one roof to homes and businesses in more than 70 countries worldwide. From its Atlanta, Ga. Headquarters, three U.S. manufacturing facilities, state-of-the-art distribution center and Advanced Technology Integration (ATI) Lab, Rheem® designs, builds and supplies some of the most reliable, environmentally responsible and technologically advanced products in the industry. Under the “One Rheem Quality” promise, every Rheem® built everywhere in the world is held to the same high standard of excellence.

*DISCLAIMER: For continuous product improvement, Rheem® reserves the right to make changes to the product specifications without notice.
